OWC ENVOY PRO ELEKTRON

USB-C

Fastest, Toughest Mini-Sized USB-C Bus-Powered SSD in the Universe

The Envoy Pro Elektron may look nice, but it plays rough. The indestructible, pocket-sized Envoy Pro Elektron puts 1011MB/s of personal and work file storage and backup in the palm of your hand – pushing USB-C's bandwidth to the max so you can edit wherever, whenever on any Mac or PC. Edit large format video footage in the field. Play your favorite games and music. Back up that work or classroom project. Whatever your data storage needs, the Envoy Pro Elektron lets you do it all up to twice as fast as other portable SSDs... on a reliable solution that's half the size of your smartphone.

It's easy to get beguiled by its sleek, silent, cool running aircraft-grade aluminum housing. But the Envoy Pro Elektron is more than just a pretty face. It is IP67-rated, so you can work in the dirtiest and wettest environments. And it's no problem if you drop this tiny, mighty drive onto a driveway or parking lot... the crushproof drive can be rolled over multiple times without damaging your precious data inside.

Key Features

- Powered by OWC Aura SSD: Advanced NVMe technology delivers up to 2x faster performance than other portable drives²
