

AKiTiO Node Titan GPU Compatibility Chart

Because it is not feasible to evaluate all of the cards on this list, we have used the best information available in addition to our test results to provide a list of cards that should work in the Node Titan. If you have concerns or questions, please contact our support team. **This list is current as of March 31, 2020. Notes:**

1. Requires macOS 10.14.6 or later.
2. Requires macOS 10.14.6 or later, or Windows 10 Build 1809 or later with the latest AMD drivers. The Radeon VII fans run normally during operation, but during sleep or shutdown, the Radeon VII fans rev up to full speed. This is an issue with the Radeon VII fan control firmware, and we do not expect that a future driver update will fix this.
3. Requires macOS 10.15.1 or later.
