

OWC Mercury Helios FX GPU Compatibility Chart

This document provides a list of GPUs (also known as “graphics cards”) and whether or not each is compatible with the Helios FX at the time of this writing. This rating may be based on the card’s peak power requirements, OS-level support, and/or other factors. This list is current as of June 1, 2018. It will be updated periodically to provide information on new families of GPUs, or pre-existing GPUs that were confirmed as compatible after the prior version of this document was released.

IMPORTANT: some cards within the same family and model of GPU have different compatibility ratings due to differences in power requirements or other factors.
