

OWC Mercury Helios FX

GPU Compatibility (Required Power)

This document provides a list of GPUs (also known as “graphics cards”) and whether or not each is compatible with the Helios FX. This rating is based on the card’s peak power requirements. If your GPU is listed but **is not compatible**, OWC recommends that you find a different, compatible GPU for your purposes.

IMPORTANT: some cards within the same family and model of GPU have different compatibility ratings, due to some cards being over-clocked, and/or having more fans or LEDs, or other variables.

IMPORTANT: this document makes no claims of compatibility with respect to the drivers or other resources provided with each card — this list relates strictly to power requirements.

This list is current as of February 26, 2018. It will be updated periodically to provide information on new families of GPUs, as they become available for testing and evaluation.

- COMPATIBLE
- NOT COMPATIBLE
